Introduction to Coohom

Cloud Interior Design Software for Professionals

Lesson 01 of 30 | Coohom Interior Design Program

Awet G. Nway

Founder, AYE Tech Hub | Interior Design & BIM Specialist

- What Coohom is and why it dominates cloud interior design
- Key features: 3D design, rendering, floor plans, 10M+ furniture library
- Coohom vs SketchUp, AutoCAD, and traditional design tools
- The 7-stage Coohom design workflow from brief to presentation
- Career opportunities for Coohom-skilled designers in Africa

What Is Coohom — and Why It Matters

Coohom is a **cloud-based interior design and visualisation platform** that allows designers, architects, and homeowners to create professional 3D interior designs directly in a web browser — without installing complex software. Founded in 2018 and now used by over **15 million users globally**, Coohom has become the go-to platform for residential and commercial interior design, especially in emerging markets across Africa, Asia, and the Middle East.

What makes Coohom uniquely powerful is its combination of: a massive furniture and material library with real-brand products, an AI-powered photorealistic rendering engine, real-time 3D visualisation, and cloud collaboration — all accessible through a standard web browser. A project that would take a traditional designer 3 days to visualise can be completed in Coohom in 2–4 hours.

The 7-Stage Coohom Design Workflow

Stage	Time (typical)	Coohom Tool Used	Output
1 — Client Brief	1–2 hrs	Notes, requirements checklist	Confirmed room sizes, style brief, budget range
2 — Floor Plan	30–60 min	Floor Plan Editor — draw walls, rooms, openings	Accurate 2D floor plan with dimensions
3 — 3D Model	60–120 min	Furniture Library — search, place, adjust all items	Furnished 3D room ready for materials
4 — Materials	20–40 min	Material Library — apply to all surfaces	3D room with flooring, walls, ceiling, finishes applied
5 — Lighting	15–30 min	Lighting Editor — natural + artificial light setup	Realistic lighting atmosphere set
6 — Render	5–30 min	Cloud Render Engine — AI-powered HD output	Photorealistic images, panoramas, or video walkthrough
7 — Present	10–20 min	Export tools — PDF, images, 3D tour link	Client presentation package ready to share

Getting started: Visit coohom.com → Create a free account. The free plan includes unlimited floor plans, 3D modelling and standard rendering. The Pro plan adds HD rendering, larger library access, and commercial use rights. For learning purposes, the free plan gives you everything covered in this 30-lesson program.

Coohom Key Features In Depth

Coohom is much more than a 3D room planner. It is a complete design-to-presentation workflow tool. Understanding all its features lets you use it at a professional level from the very first project.

Figure 2 — Coohom Key Features Overview

Feature	Free Plan	Pro Plan	Why It Matters
Floor plans	Unlimited	Unlimited	Core feature — draw any space from studio apartment to hotel lobby
Furniture library	10M+ items	10M+ + exclusive brands	Real-brand products mean clients see exactly what they will buy
Standard renders	Unlimited (720p)	Unlimited	Sufficient for client presentations and mood boards
HD / 4K renders	Limited (5/month)	Unlimited	Required for professional deliverables, print, social media
360° Panorama	Yes (standard res)	Yes (HD)	Immersive view lets clients "stand inside" the design
3D Walkthrough video	Limited	Unlimited	Most powerful client engagement tool — show, not just tell
Commercial license	No	Yes	Required to sell designs or use outputs for client projects
Team collaboration	Limited	Full (multi-user projects)	Essential for design firm workflows

System Requirements

Requirement	Minimum	Recommended
Browser	Chrome 80+, Firefox 75+, Edge 80+	Chrome (latest) — best performance and compatibility
Internet speed	5 Mbps (standard use)	20 Mbps+ for 4K rendering and large projects
RAM	4 GB	8 GB+ for complex projects with many objects
GPU	Integrated graphics (basic features)	Dedicated GPU (NVIDIA/AMD) for faster 3D viewport
Screen resolution	1280 × 768	1920 × 1080+ (Full HD) for comfortable workspace
Mobile (tablet)	iPad (iOS 13+) or Android tablet	iPad Pro for best mobile experience

Coohom vs Traditional Design Tools

Interior designers traditionally used AutoCAD for floor plans, SketchUp or 3ds Max for 3D models, and Photoshop for presentations. This required expensive software, powerful hardware, years of training, and long lead times for revisions. Coohom collapses the entire workflow into one cloud platform accessible to anyone.

Figure 3 — Traditional vs Coohom Workflow: 5-Metric Comparison

Tool	Strengths	Weaknesses	Best For
Coohom	Fast workflow, huge library, cloud-based, photorealistic renders, accessible cost	Limited parametric design, less suitable for complex architecture	Interior design projects — residential and commercial
SketchUp	Powerful 3D modelling, large plugin ecosystem, architectural precision	Rendering requires extra plugins (Enscape/V-Ray), steeper learning curve	Architectural design, complex 3D modelling tasks
AutoCAD	Industry standard for precise 2D technical drawings, widely accepted	No native 3D rendering, expensive, complex learning curve	Construction drawings, technical documentation, engineering
3ds Max	Most powerful rendering and animation, professional quality output	Very expensive, complex, weeks to learn basics	High-end architectural visualisation, film, animation
SketchUp + Enscape	Real-time rendering, VR, excellent architectural accuracy	High cost (SketchUp + Enscape subscriptions), hardware intensive	Architecture firms, large-scale visualisation projects

Career Opportunities for Coohom-Skilled Designers

Career Path	How Coohom Skills Help	Market Demand
Interior Designer (freelance)	Deliver professional client presentations fast; win more projects	High — growing middle class in Africa/Asia drives demand
Interior Design Firm (employee)	Speed up project delivery; collaborate with team on cloud	High — firms need designers who can visualise quickly
Furniture / Retail Showroom	Show customers how products look in their space before purchase	Very high — retail design visualisation is booming
Real Estate Developer	Market off-plan units with furnished 3D visuals before construction	Very high — renders sell properties before they are built
Online Interior Design Services	Provide remote design services globally; deliver via share link	Growing fast — e-design market expanding across Africa
Content Creator / Educator	Create design tutorials, before/after transformations, social content	High — design content performs extremely well on social media

What comes next — COHOOM-002: Coohom Interface and Navigation — a full tour of every panel, tool, and menu in the Coohom workspace. You will learn every shortcut, panel, and navigation technique needed to work efficiently on real projects.
