

The Engineer's Guide to Success

Escaping the Farm

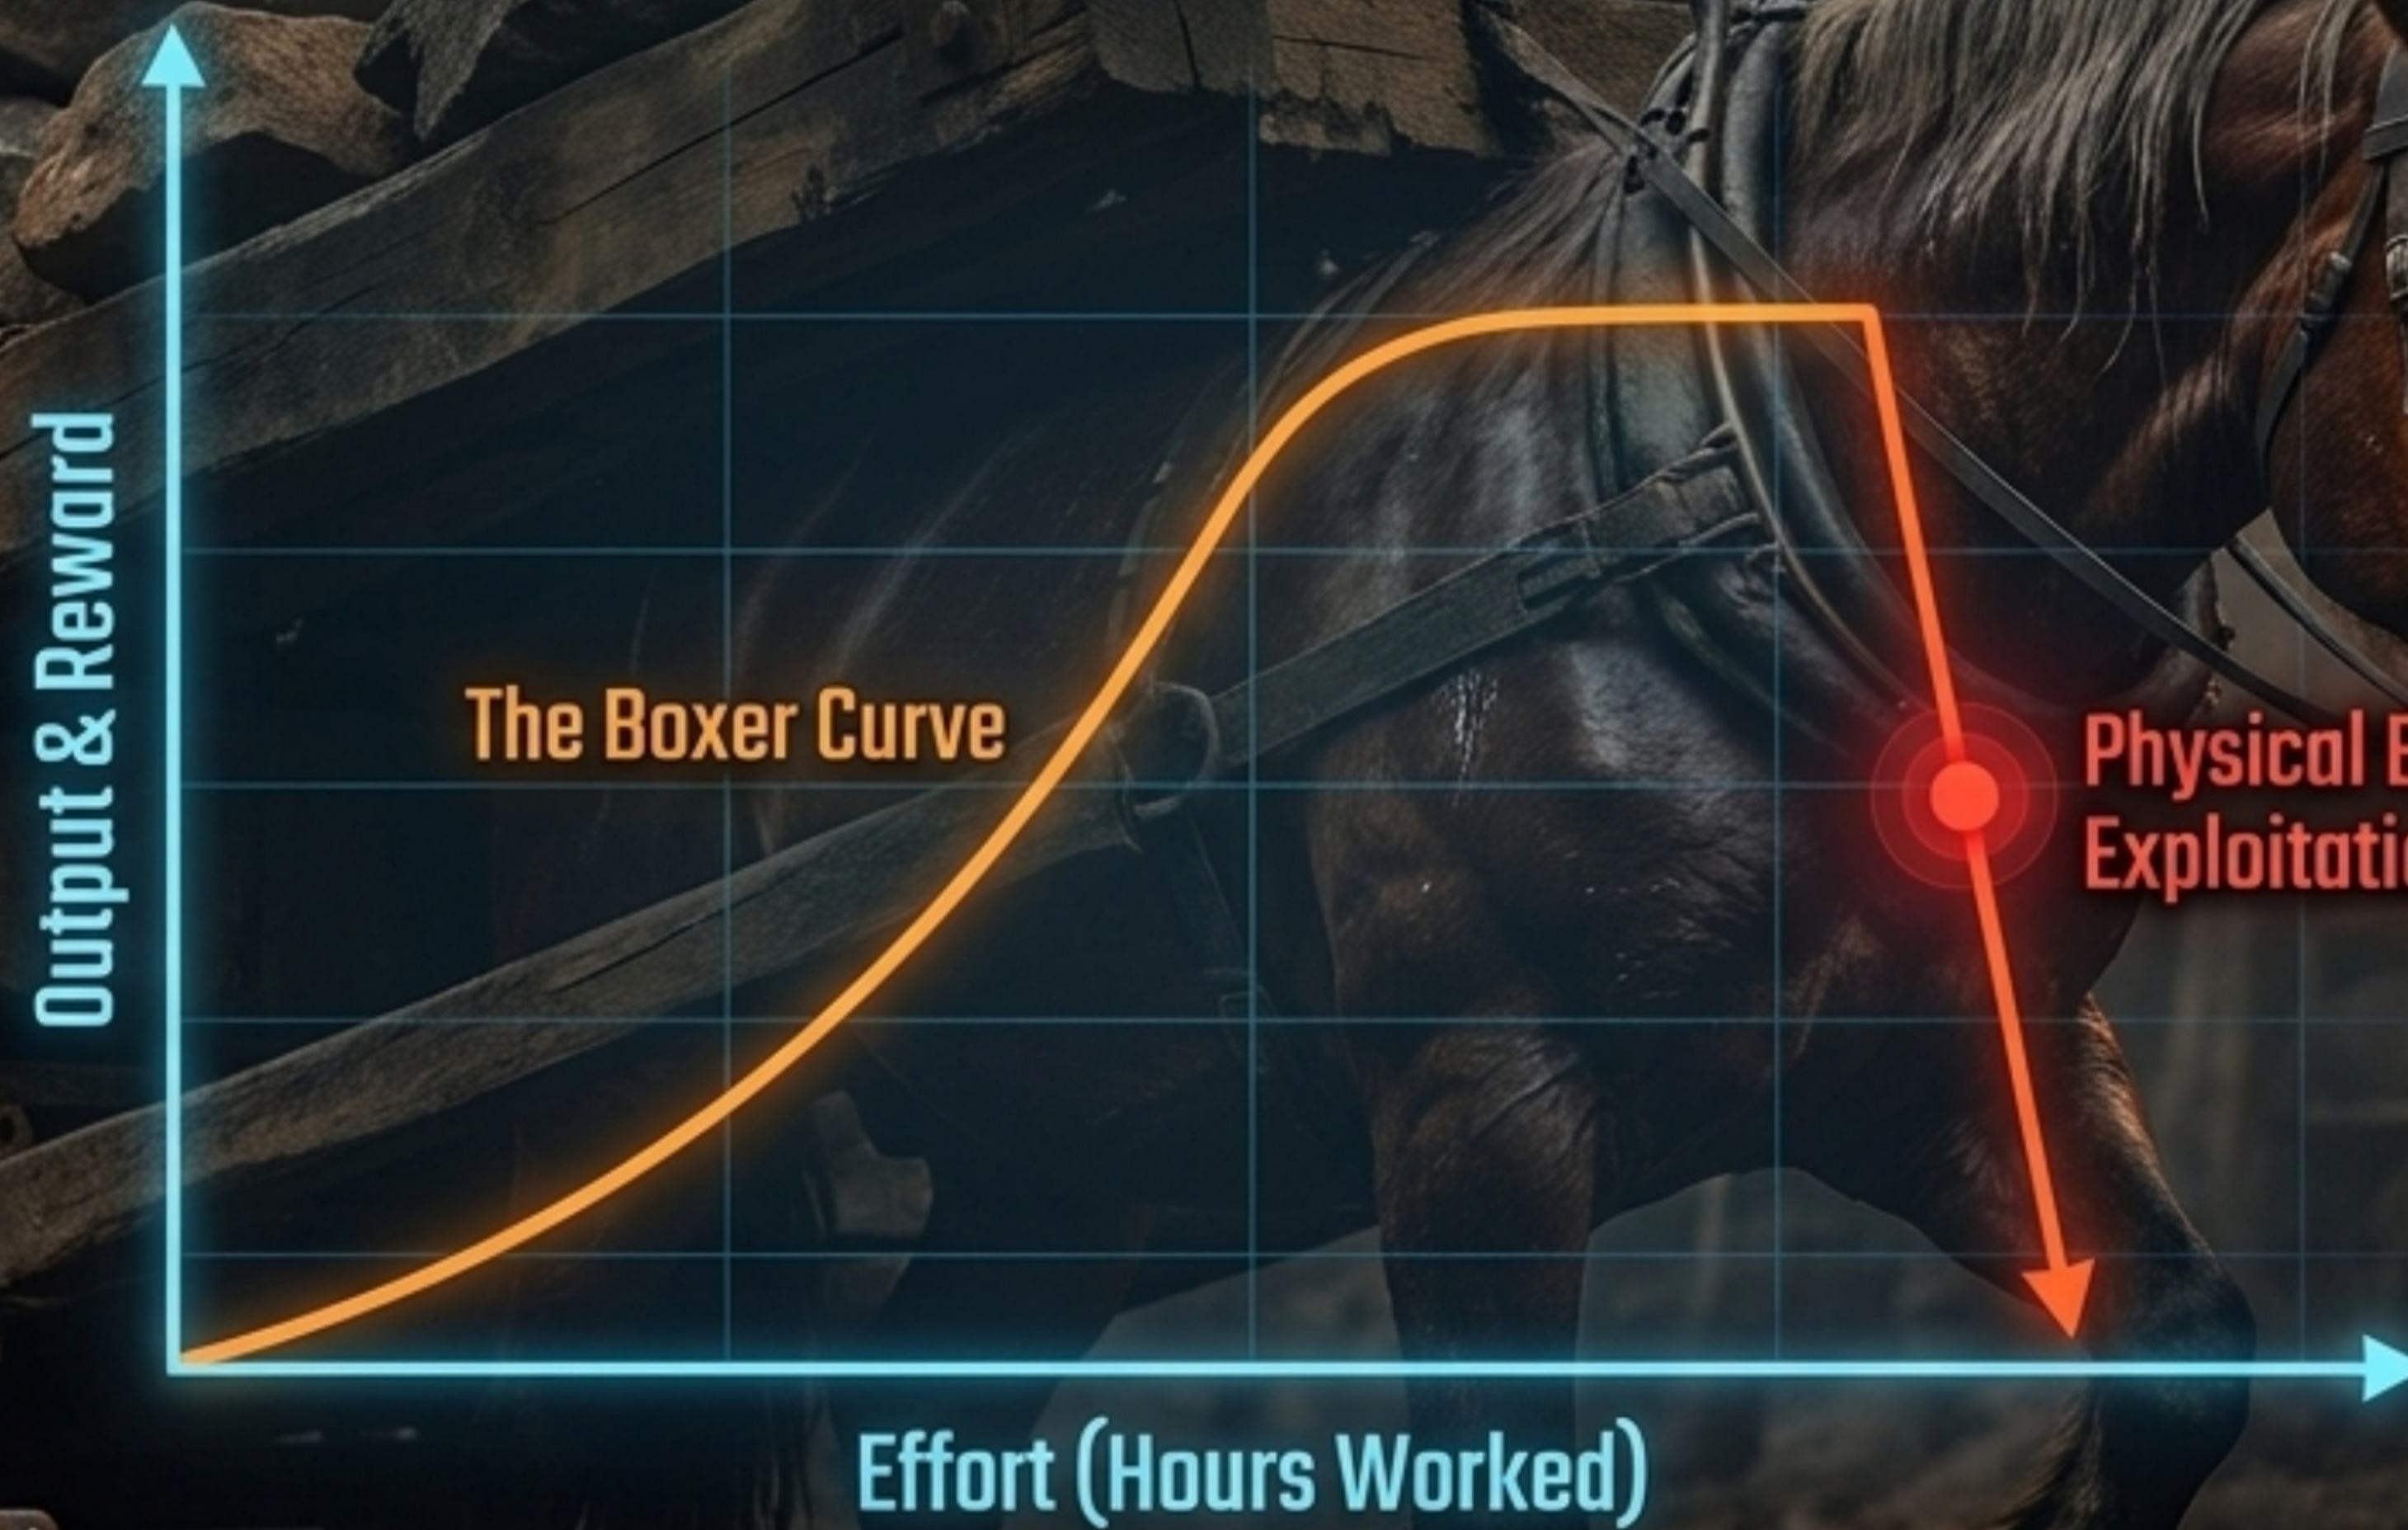

A 1945 Fable for the 2026 Industrial Landscape

George Orwell wrote *Animal Farm* almost 80 years ago. Today, it is not just a story about animals. It is a mirror for the modern engineering career. You must choose your archetype.

The Boxer Trap: Hard Work Alone Is Not Enough

"I will work harder."

Loyalty and strength are powerful,
but trusting outdated systems
blindly leads to exploitation.

Work hard like Boxer,
but never be blind.

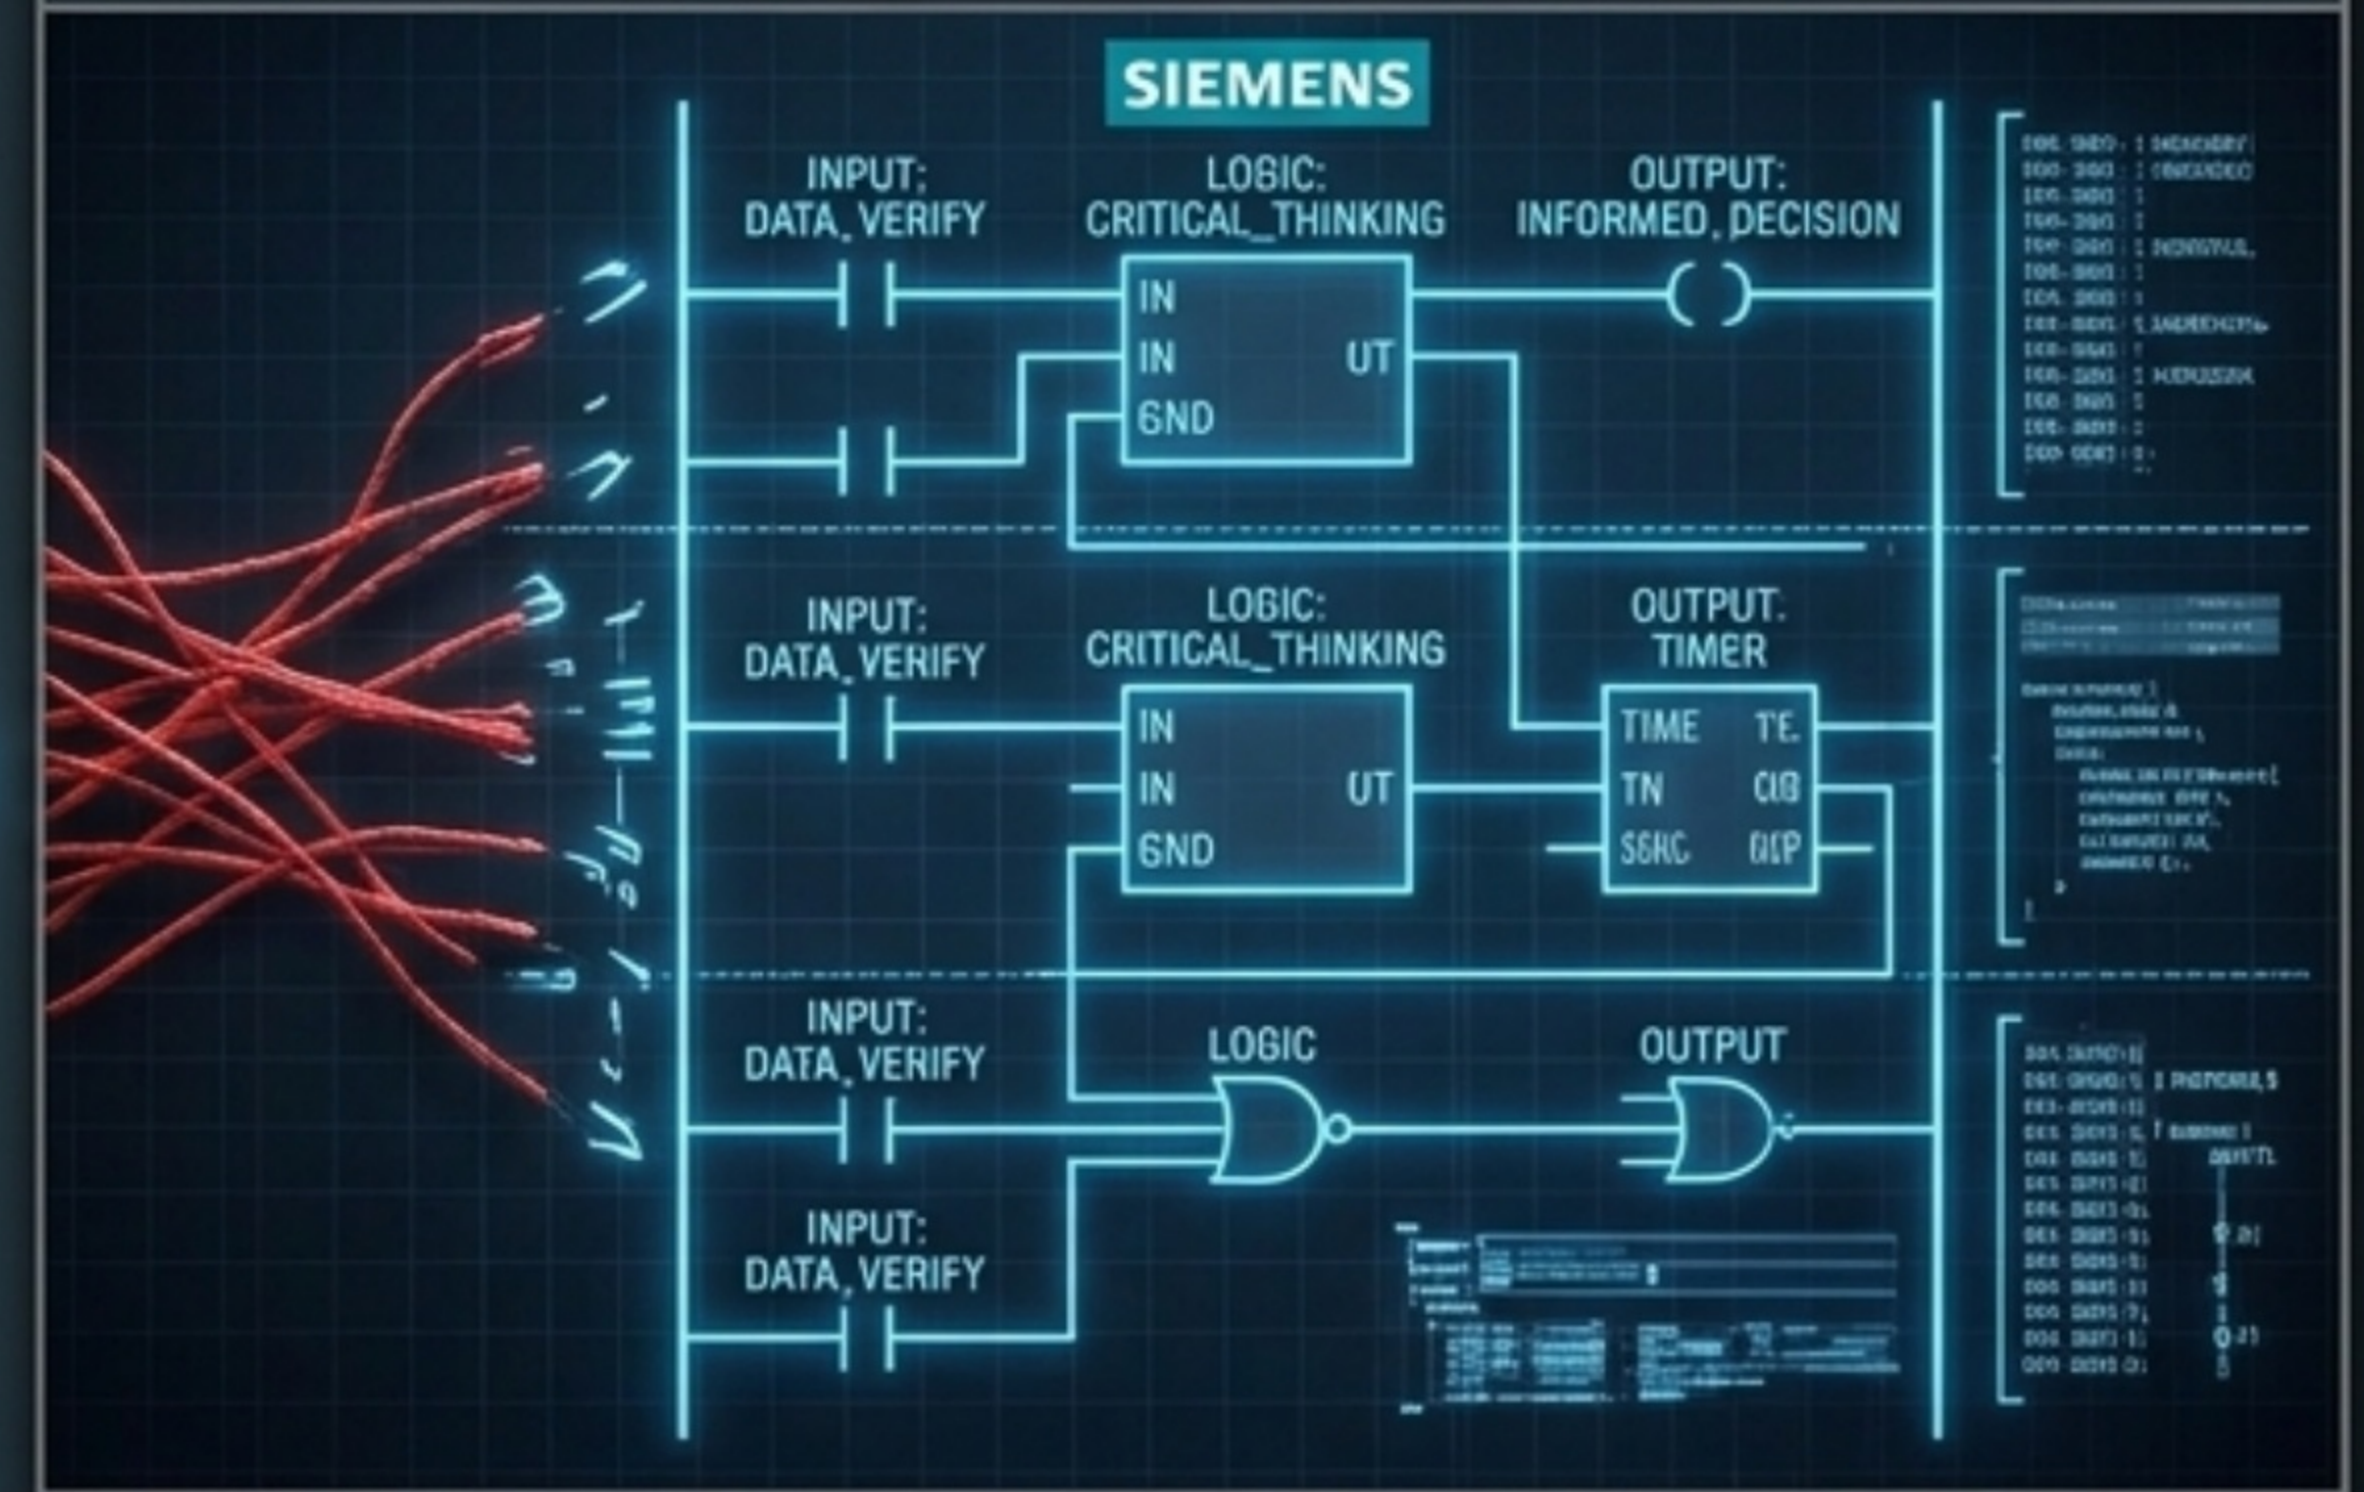

Surviving Napoleon and Squealer

Squealer's Trap

The Age of Manipulation: Power without accountability, fake news, and propaganda.

The Engineer's Defense

The Age of Logic: AI-driven critical thinking, structural analysis, and data verification.

Modern success requires more than sweat. It requires the ability to analyze information, rewrite bad code, and refuse manipulation. Not every motivational speaker or viral trend wants to help you.

The Required Shift: From Wisdom to Innovation

The Farm (Analog/Dirt)

Observe like Benjamin. He understood the truth early, but stayed silent.

Wisdom without action is stagnation.

**Be wise like Benjamin,
act like Snowball.**

The Hub (Digital/Data)

Act like Snowball.

Representing intelligence, learning, and innovation. In 2026, AI, coding, and automation shape the future.

The Farm vs. Future Diagnostic Matrix

The Farm Mindset

Manual/Muscle Force (Boxer)

Power Source

The AYE Tech Hub Standard

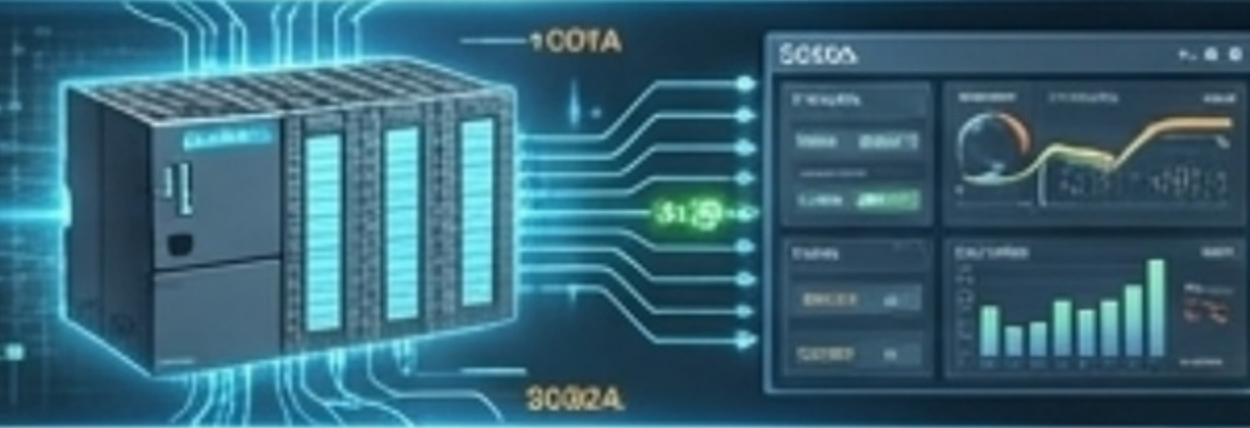

Solar/Renewable Energy Networks

Blind Trust & Loyalty

Control System

PLC Automation (Siemens S7) & SCADA

Overtime & Exhaustion

Career Strategy

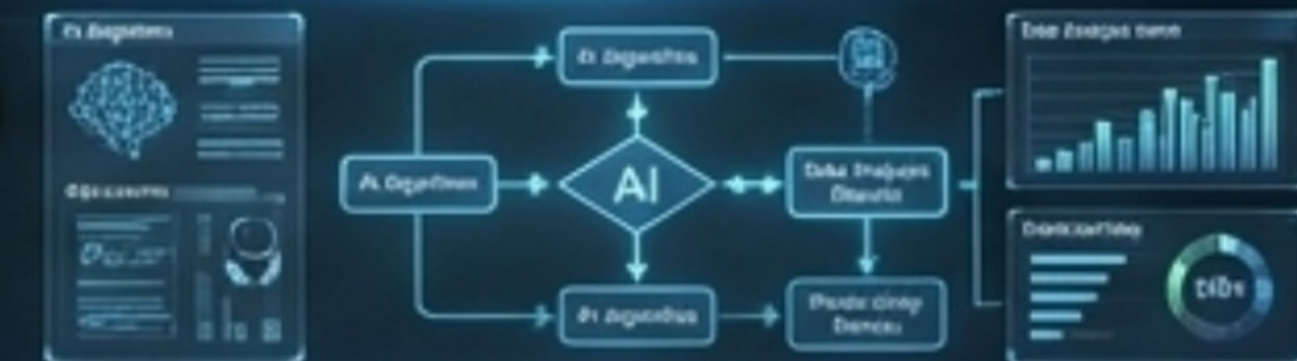

Continuous Upskilling (AI, Revit, BIM)

Silence & Compliance

Defense Mechanism

Strategic Logic & AI Productivity

Without mastery of modern tools, an engineer is just another Boxer on someone else's farm.

Kinematic Joints

HMI Interface

**Don't just work hard. Learn hard.
Code the system that lifts the weight.**

Bridging the Gap: From Ethiopian Classrooms to Korean Robotics Floors

2016: BSc Mechanical Engineering, ASTU, Ethiopia.

2018: Production Leadership. Honored by H.E. Dr. Mulatu Teshome (Former President of Ethiopia) for engineering excellence.

2019-Present: Robotics Maintenance & PLC Operations at ASAN Auto Parts, South Korea.

2026: Founding AYE Tech Hub.

“Africa’s next industrial revolution will be built by African engineers.
AYE Tech Hub exists to make that real.”

— Awet G. Nway, Founder & CEO.

AYE TechEngine: Master the Machinery

Industrial Automation

PLC Programming
(Ladder Logic, FBD),
SCADA, Sensor Integration.

Robotics & Maintenance

Kinematics,
ABB & KUKA systems,
predictive mechanical
maintenance.

CAD & Design

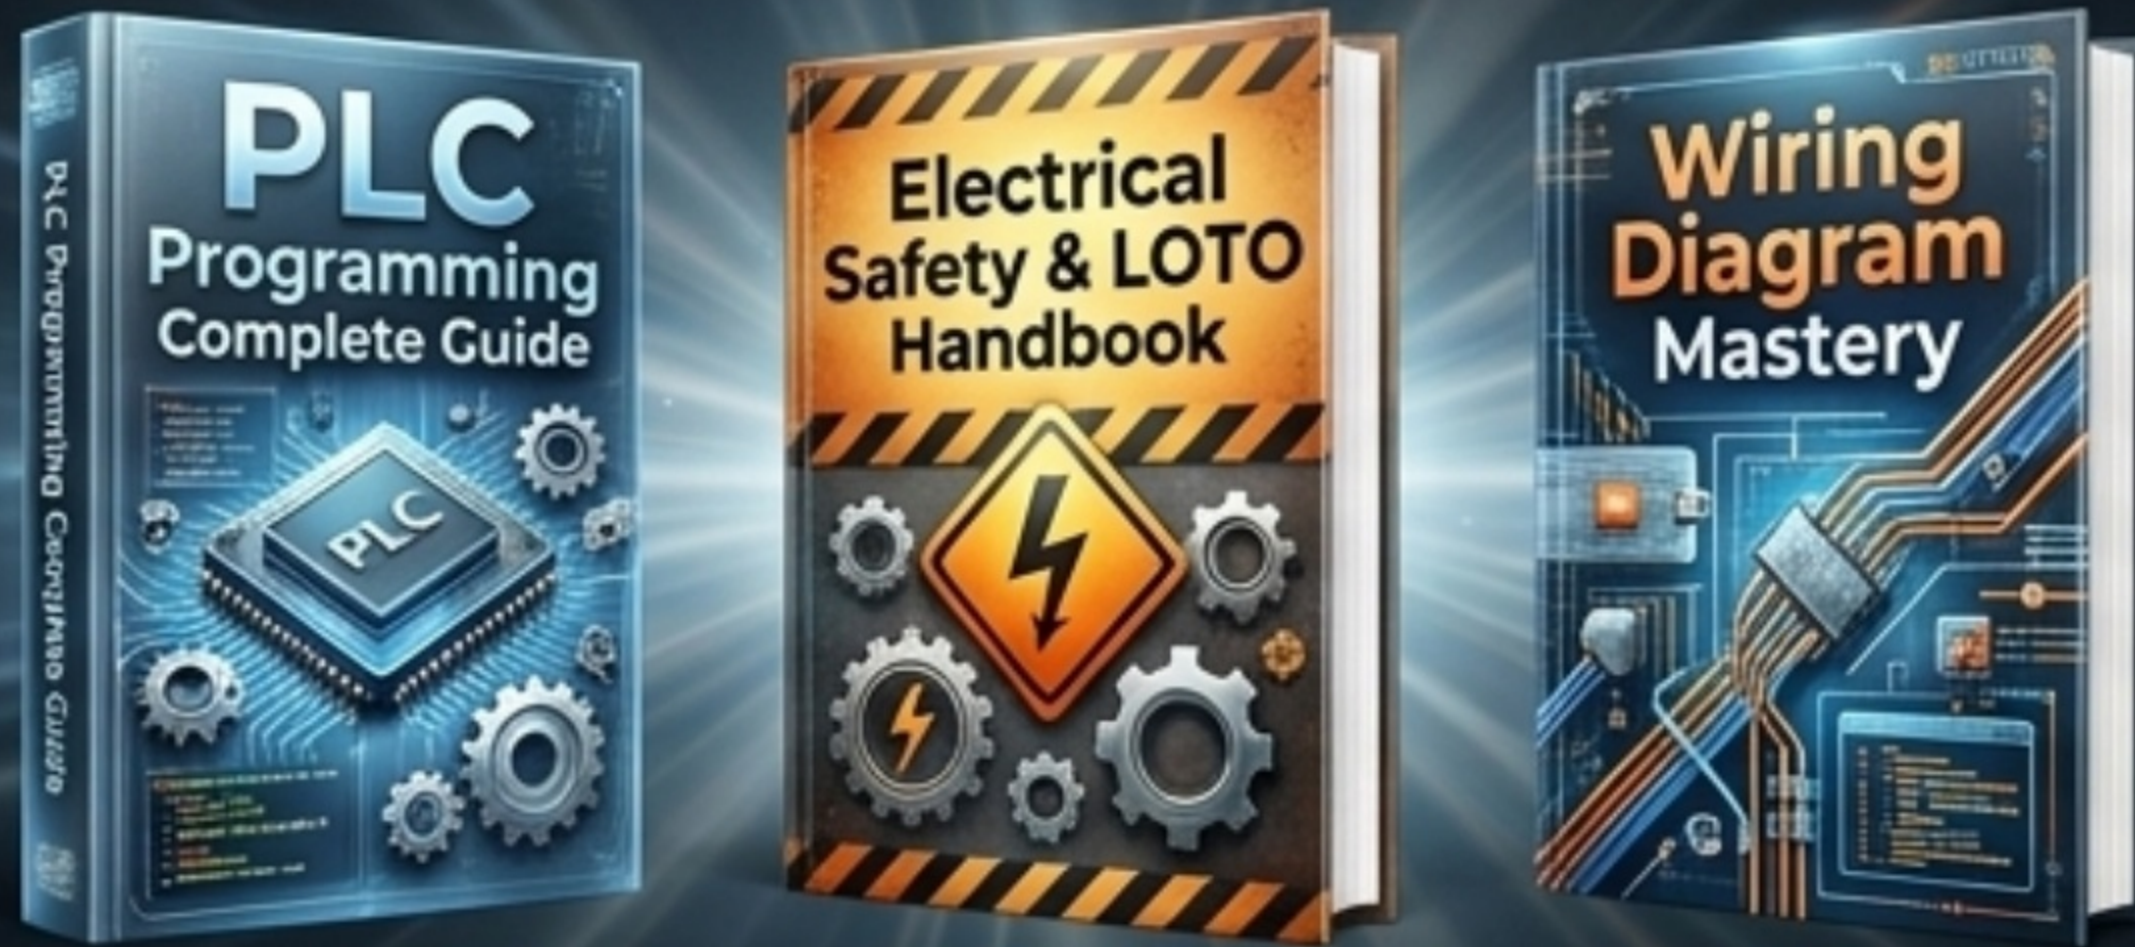

Revit Architecture, structural
BIM, 2D/3D modeling,
MEP Engineering.

Learn • Design • Build • Innovate.

Escaping the farm requires mastering the tools that run it.

AYE TechPro: The Digital Arsenal

The Library

The AI Toolkit

The modern Snowball doesn't just read books; they leverage artificial intelligence to design future-ready workflows. Free, global access for modern professionals.

Grounding the Future in Tigray, Ethiopia

Off-grid & grid-tied
Solar Installation.
Clean energy solutions.

HVAC and precise
Interior Design finishing.

Complete MEP (Mechanical,
Electrical, Plumbing) and
Structural engineering.

Bringing Korean industrial standards
to homes and businesses in Tigray.

Honest pricing, qualified local experts,
and energy-efficient designs.

The Power Dynamics Triangle

Humans, Pigs, Dogs

Open-Source Knowledge,
AI Training, PLC Mastery

The Farm Hierarchy (Workers)

Knowledge flat lines hierarchies. By mastering industrial technology through AYE Tech Hub, you place yourself at the center of your own success.

The New Industrial Revolution

Animal Farm is a story of human nature.

Work hard like Boxer. Learn like Snowball.
Observe like Benjamin.

But never allow the world to control your
thinking. Real success is awareness, freedom,
knowledge, and self-respect.

AYE Tech Hub training center launching in Mekelle, Tigray.
Engineering the future through technology and knowledge. Join the movement.
